

RESOLUTION ECOLOGY FUTURE FORUM2020

"Think globally, act locally"
Environmental slogan

International Environmental Forum Of The Future
#Ecology Future Forum2020 was held online
June 5-7, 2020, and was dedicated to all medical professionals in
the world.

For 3 days of successful work :

- The Forum was attended by 31 speakers and 5 excellent musicians;
- Speakers represented 15 countries of the world;
- The total number of Forum participants for 3 days was about 2000 people.

The results of our work are the following initiatives:

1. Strengthening interaction and communication between children's environmental organizations in different countries.
2. The ongoing implementation of the action "Acosta Russia invite friends." Where it will be possible to receive guests not only from the regions of Russia, but also from Italy, Armenia, the Netherlands, Germany, Sweden, Switzerland, India, the UAE and other countries.
3. Consideration of the possibility of an international project for environmental cooperation in the Arctic, in which children from the Barents sea basin countries would participate along with Russian regions.
4. a Proposal to devote one of the future sessions of our Forum specifically to the development of children's and youth

environmental movements in different countries, with the participation of representatives of these organizations themselves.

5. Creation of an information portal under the aegis of our Ecology Future Forum about the experience of developing environmental education for children in different countries of the world.

6. Development of its own YouTube channel Ecology Future Forum, where all the speeches of the Forum speakers would be posted, as well as the main news related to the ecology of our planet, the ecology of life, the ecology of preserving human and cultural potential would be constantly covered.

7. Creating an online school "Ecology of Life".
Online schools where the main focus would be on the development and education of the younger generation in environmental issues.
And training in the basic principles of "Ecology of Life" for employees of state and commercial corporations.

8. Use the proceeds from the Forum to support families with children and the elderly who are in dire need.

9. Organization in the West of the island of Gotland (Sweden), a closed ecological space of like-minded people Royal Baltic Polo Resort

- with eco-houses;
- horses and Polo;
- healthy food restaurant;
- space for festivals and conferences;
- active tourist zone;
- space for family and children's recreation;
- maintaining all the attributes of a healthy lifestyle for adults and children: sports, sports competitions, yoga, meditation, digital detox, etc.

10. Establishing close cooperation with the aim of transferring invaluable experience between the governments of Russia and Sweden in matters of ecology, waste recycling and waste disposal .

11. The transition to a "reasonable consumption" residents of developed countries, namely the selection and purchase of those or other things. Since this minimizes the harm that production, and the person himself, cause to nature and the environment.

12. Promoting the development of friendship of peoples and dialogue of cultures. The need to form a global earth identity, while preserving the unique identity of each country.

13. The emphasis on biological diversity. Human activities should be aimed at increasing biodiversity in the ecosystem.

14. finding a compromise between globalization (people's desire to travel, get an education in foreign countries) and reducing the carbon footprint left by humans.

15. Follow the 17 UN sustainable development goals aimed at eliminating poverty, preserving the planet's resources and ensuring well-being. To achieve these goals, civil society, business and Government must work together.

16. Summary to action on the Kursk Battery plant:

- environmental measures to clean up the territory of the old part of the plant and start land reclamation
- replacement of old equipment with newer, technological and energy-saving, with new efficient water and air purification systems.
- introduction of a system of separation and sorting of household waste with further own processing or disposal at processing plants.

- training the children of employees and their friends in sorting household waste and cultural waste management.

17. Development of Ecotourism as the future of our Planet Earth.

18. Meetings with students of school age in schools, clubs - conversations about life, art, painting, everything that inspires a person to health, peace, ecology and self-development.

Remember that children are our Future!
